

CAWTILE

***CITIZENS AGAINST
WIND TURBINES***

In

LAKE ERIE

Have we willingly blinded ourselves and accepted the nonsensical climate catastrophe narrative?

**CLIMATE FRAUD
and
NET-ZERO**

Alice Returns to Wonderland

Believing the impossible?

Alice said to the Queen:

One can't believe impossible things!

The Queen replies to Alice:

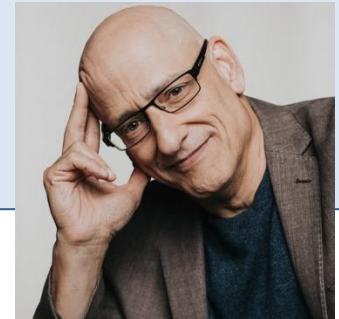

I dare say you haven't had much practice believing impossible things! When I was younger, I always practiced believing impossible things for half an hour a day!

Why sometimes I believed as many as six impossible things before breakfast!

Useful Commentary on Climate Fraud

If useless measures are not quickly put in place to do nothing about climate change, we will soon be faced with an emergency situation – in which hurricanes continue to strike the gulf coast as they have done every year in human memory.

(Klavan)

Storms are worse than ever !

According to “Green” experts, climate change has caused these hurricanes and other storms to intensify to exactly the same level they were before.

Now there are far more climate catastrophes reported than there were before climate catastrophes were reported.

(Klavan)

More people dying than ever !

As a result, whereas in the 1920s nearly 500,000 people were killed yearly in climate related disasters, last year that number rose dramatically to 7,000 people.

(Klavan)

The world has already ended !

If we fail to act soon, Al Gore's most dire predictions will come true and the world will be destroyed 10 years ago.

(Klavan)

Science vs. “The Science”

Science: Application of scientific method to separate a hypothesis that is demonstrably false from one which might be true.

“The Science”: Purposely ignores Scientific Method

- Merely provides conjecture about some phenomenon
- Logical fallacy of Reference to Authority: “**Experts say...**” vs. “**Data Says**”
- Logical fallacy of Majority View: “**Consensus is...**” vs. “**Data Says**”

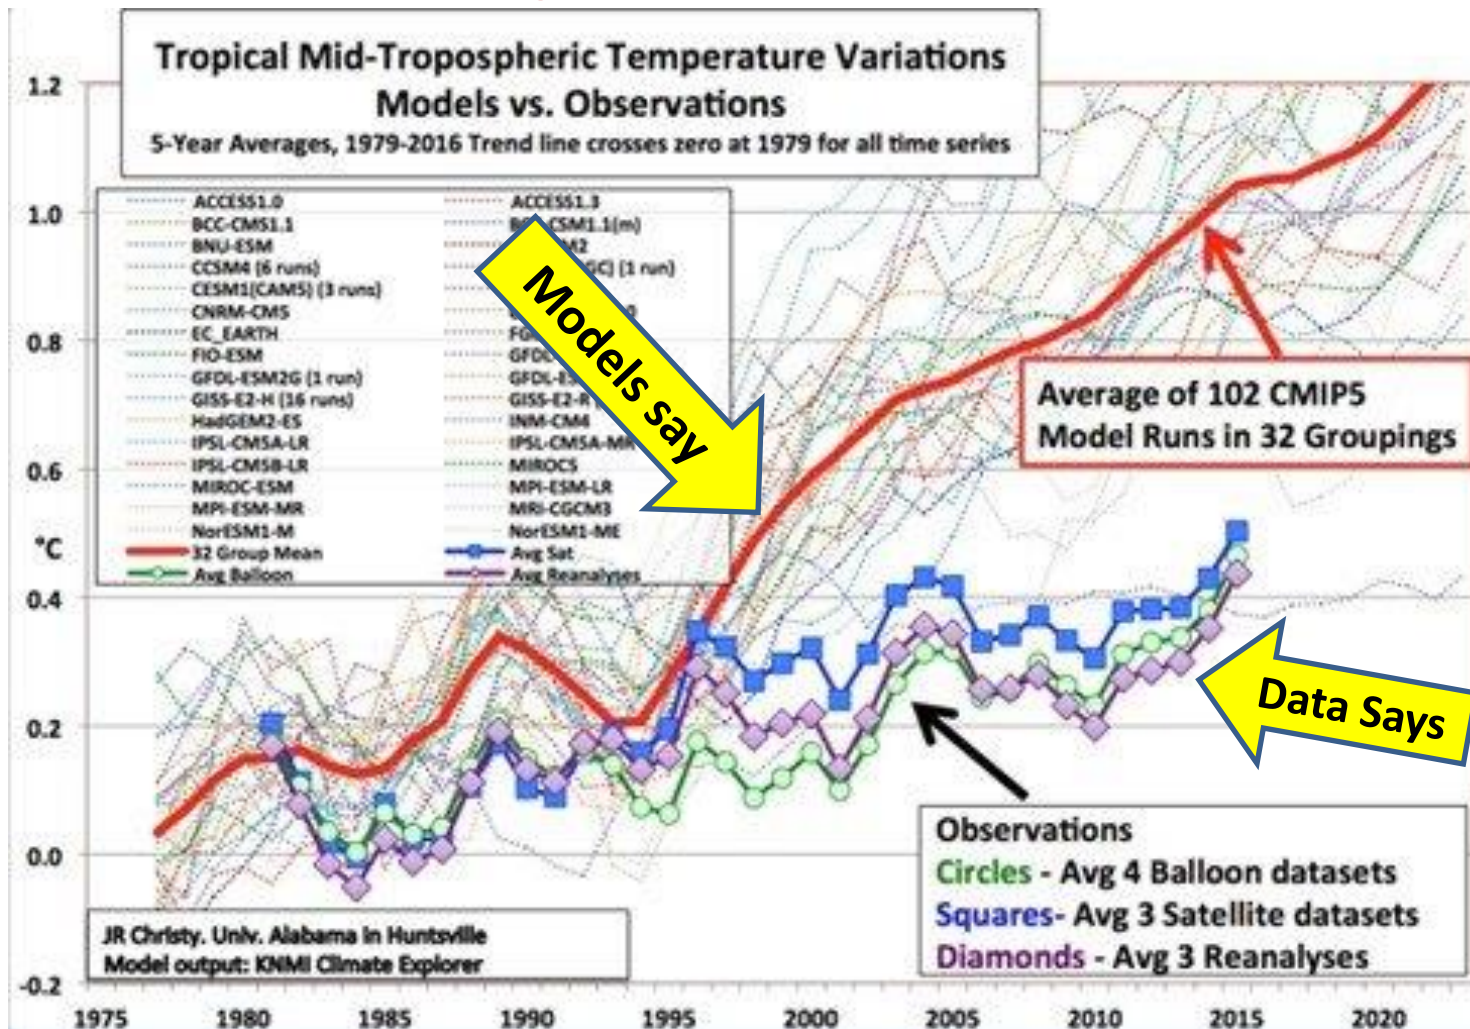

THE FRAUD BEHIND NET-ZERO

“Experts” say that that CO₂ is the control knob on global temperature, causing human catastrophes unseen before.

Ergo, we must eliminate all CO₂ (Net Zero)

Claim: Models prove CO2 is climate driver

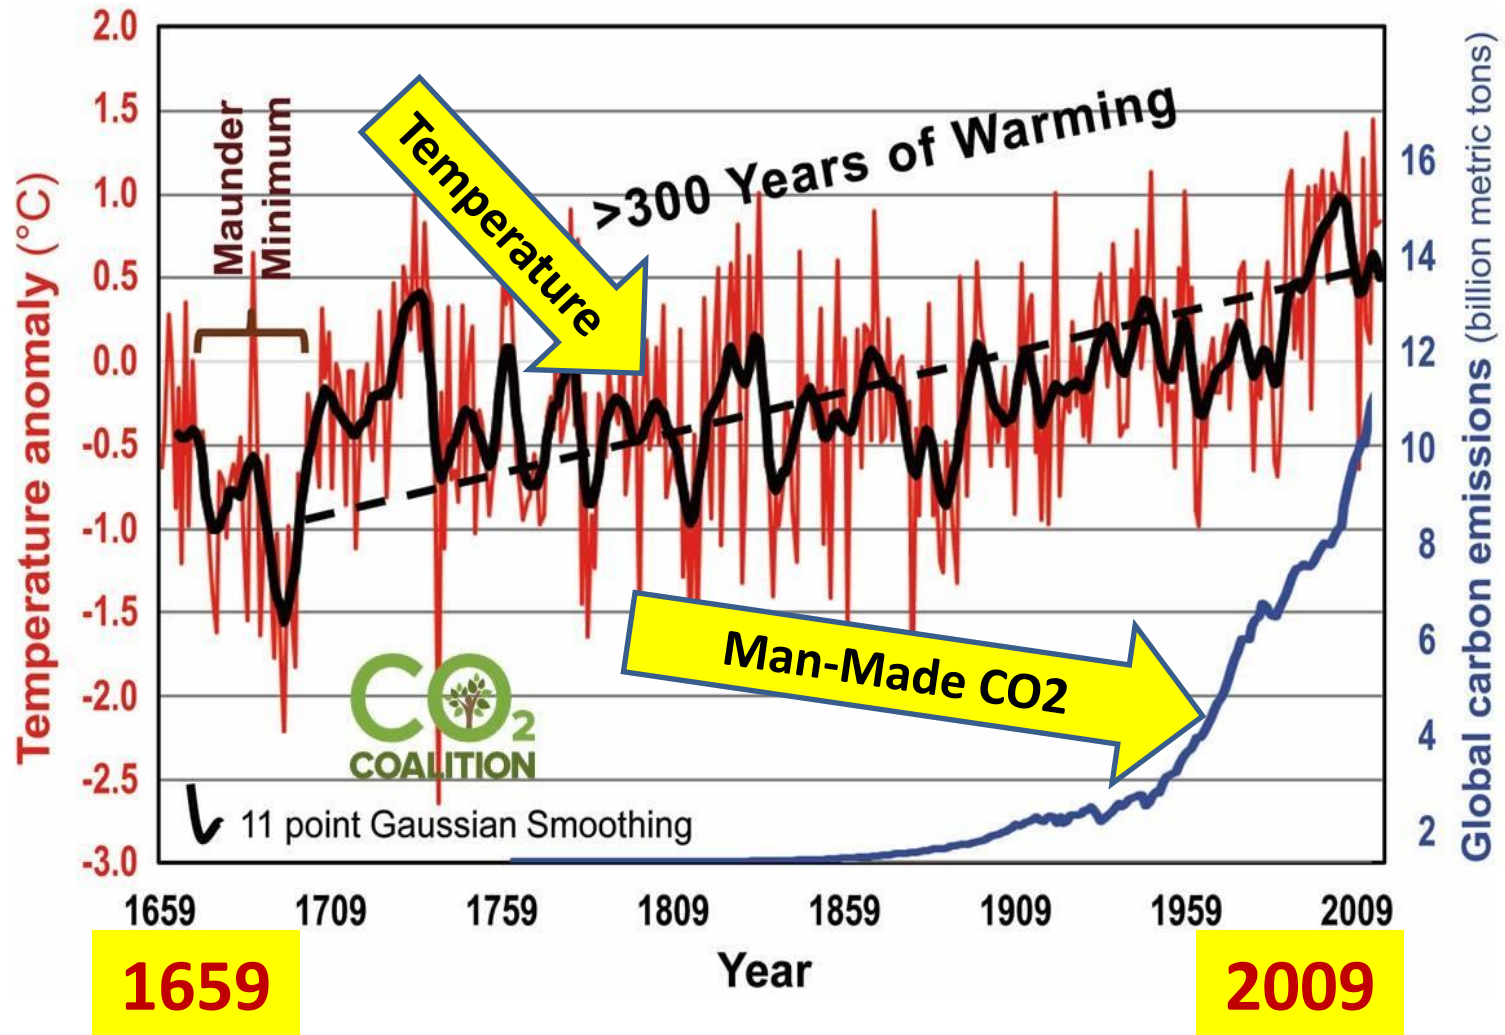

1975

Conclusion: We must REJECT the hypothesis that CO2 is the primary driver.

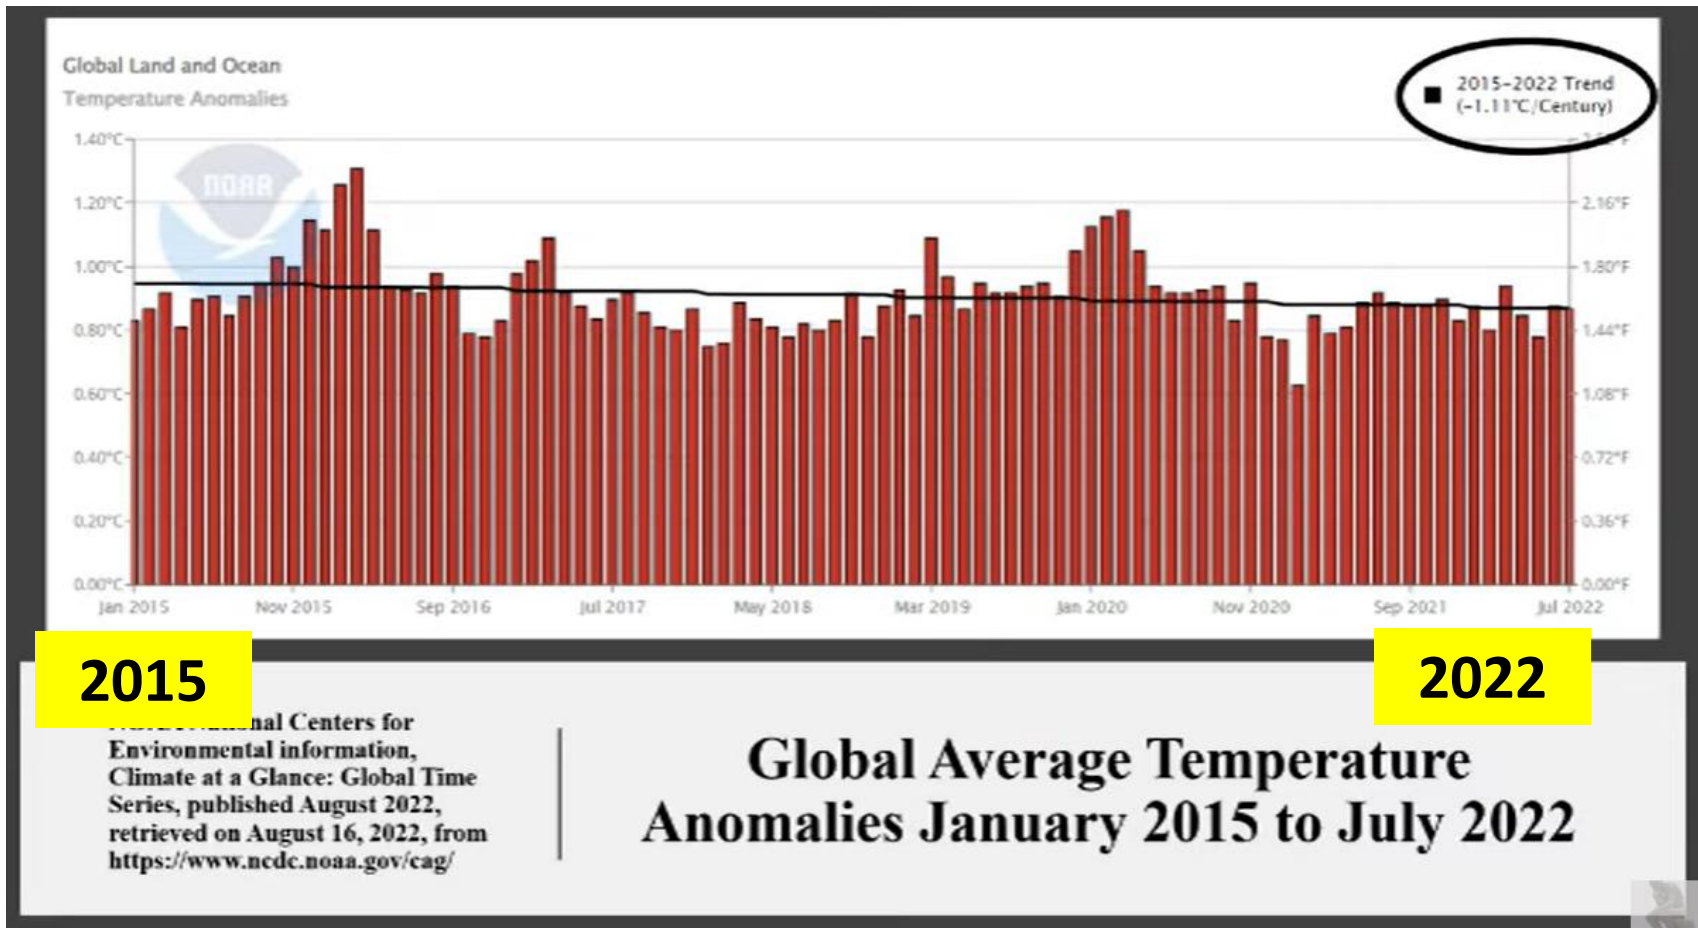

2020

Claim: CO2 Drives Temperature

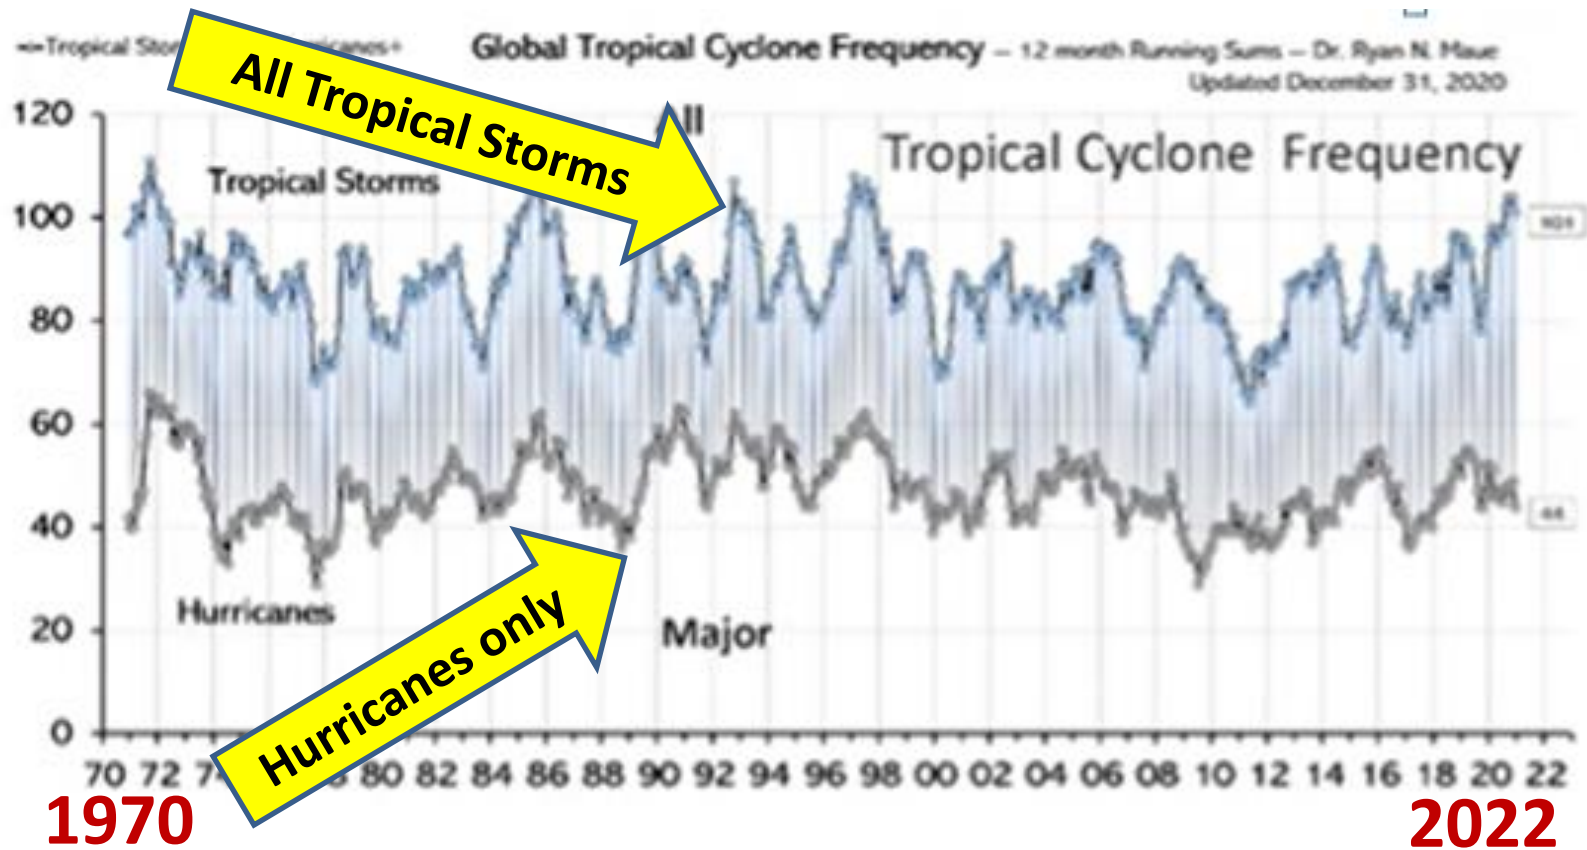

Conclusion: Temperature does not correlate to CO₂; CO₂ is not the driver.

Claim: Global temperatures are spiking from CO2

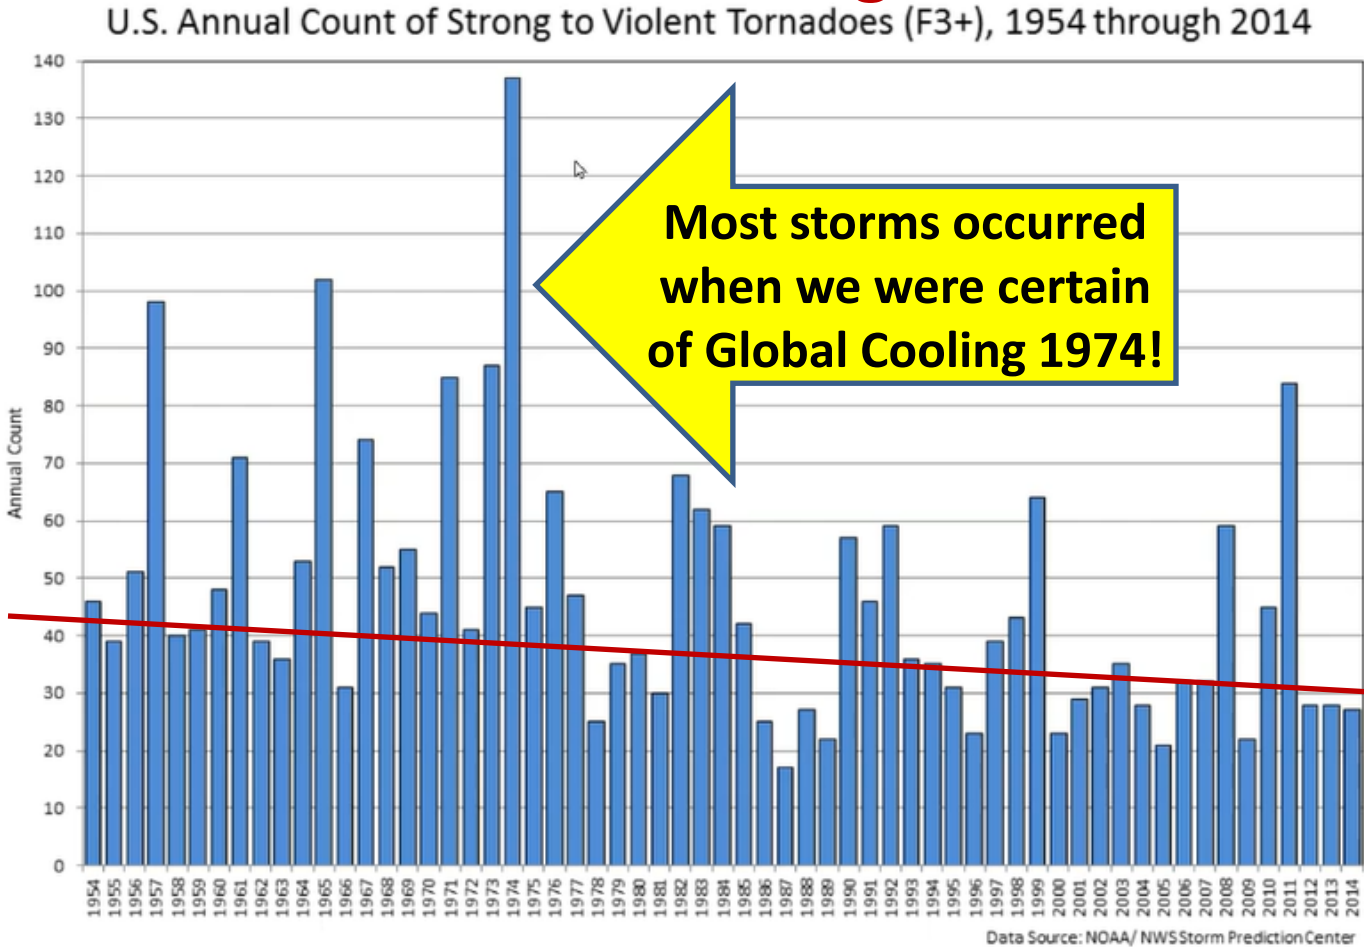

Conclusion: No evidence of warming since 2015, in spite of rising CO2.

Claim: Tropical storms are stronger and more frequent because of CO2

Conclusion: Tropical storms are neither stronger nor more frequent from man-made CO2.

Claim: Tornadoes are more frequent and stronger because of rising CO2

1954

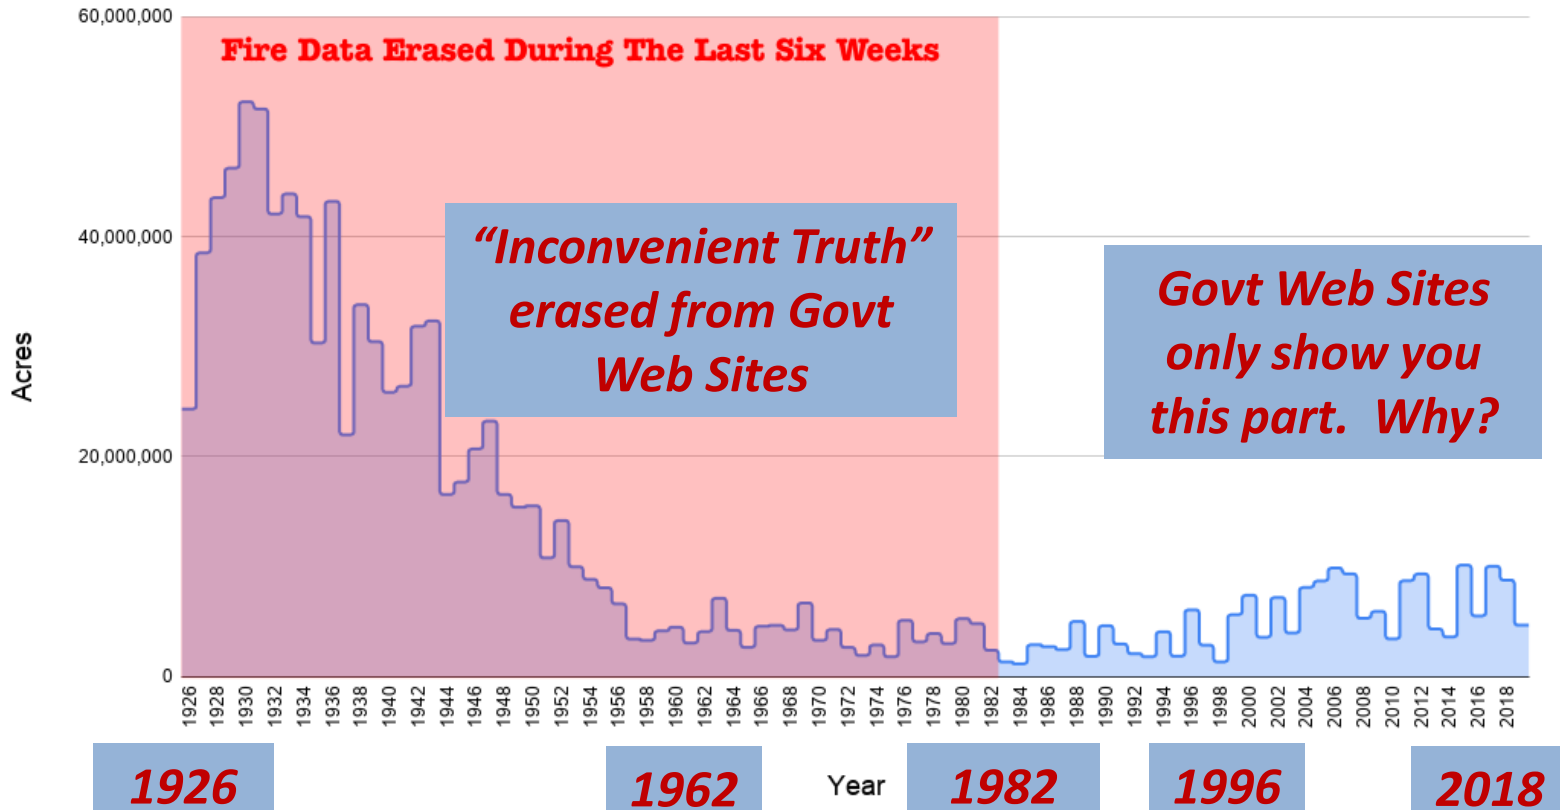

Conclusion: Tornadoes are not stronger or more frequent due to man-made CO2

2014

Claim: Forest fires are getting worse.

National Interagency Fire Center Burn Acreage - January 29, 2021

https://web.archive.org/web/20210129125036/https://www.nifc.gov/fireInfo/fireInfo_stats_totalFires.html

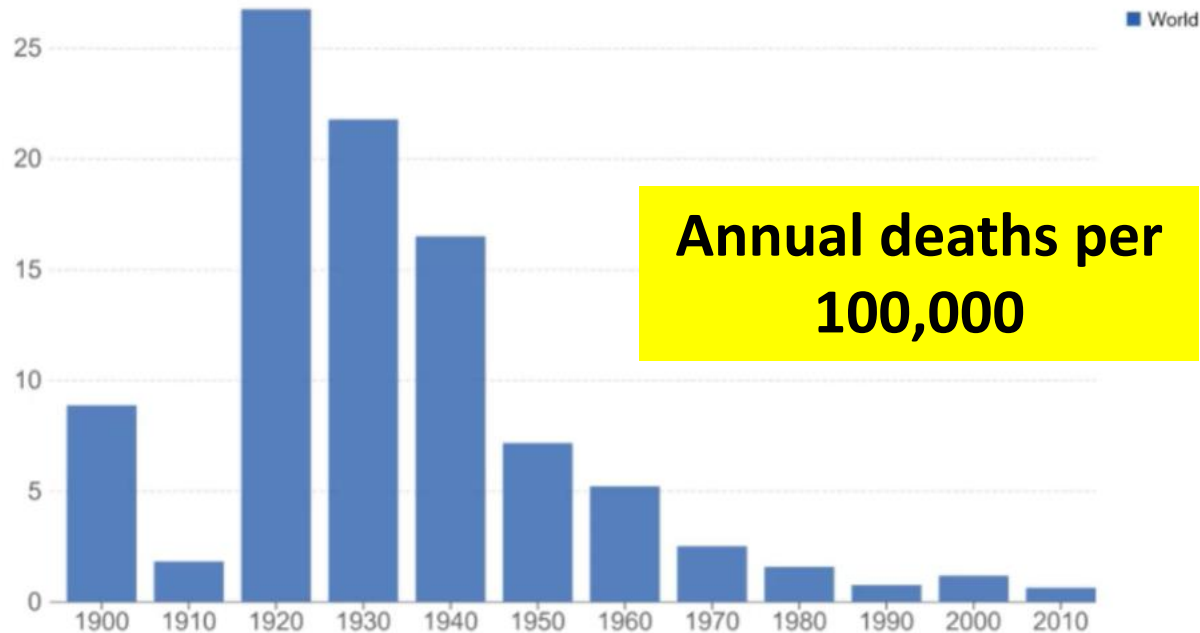

Reality: Forest fires are not getting worse. In fact, they were 4x as bad in the early 1900s.

Claim: More people are dying from climate disasters

Decadal average: Death rate from disasters

Death rates are measured as the number of deaths per 100,000. Decadal figures are measured as the annual average over the subsequent ten-year period. Disasters include all geophysical, meteorological and climate events including earthquakes, volcanic activity, landslides, drought, wildfires, storms, and flooding.

Our World
in Data

Source: Our World in Data based on EM-DAT, CRED / UCLouvain, Brussels, Belgium – www.emdat.be (D. Guha-Sapir)

CC BY

Note: Decadal figures are measured as the annual average over the subsequent ten-year period. This means figures for '1900' represent the average from 1900 to 1909; '1910' is the average from 1910 to 1919 etc.

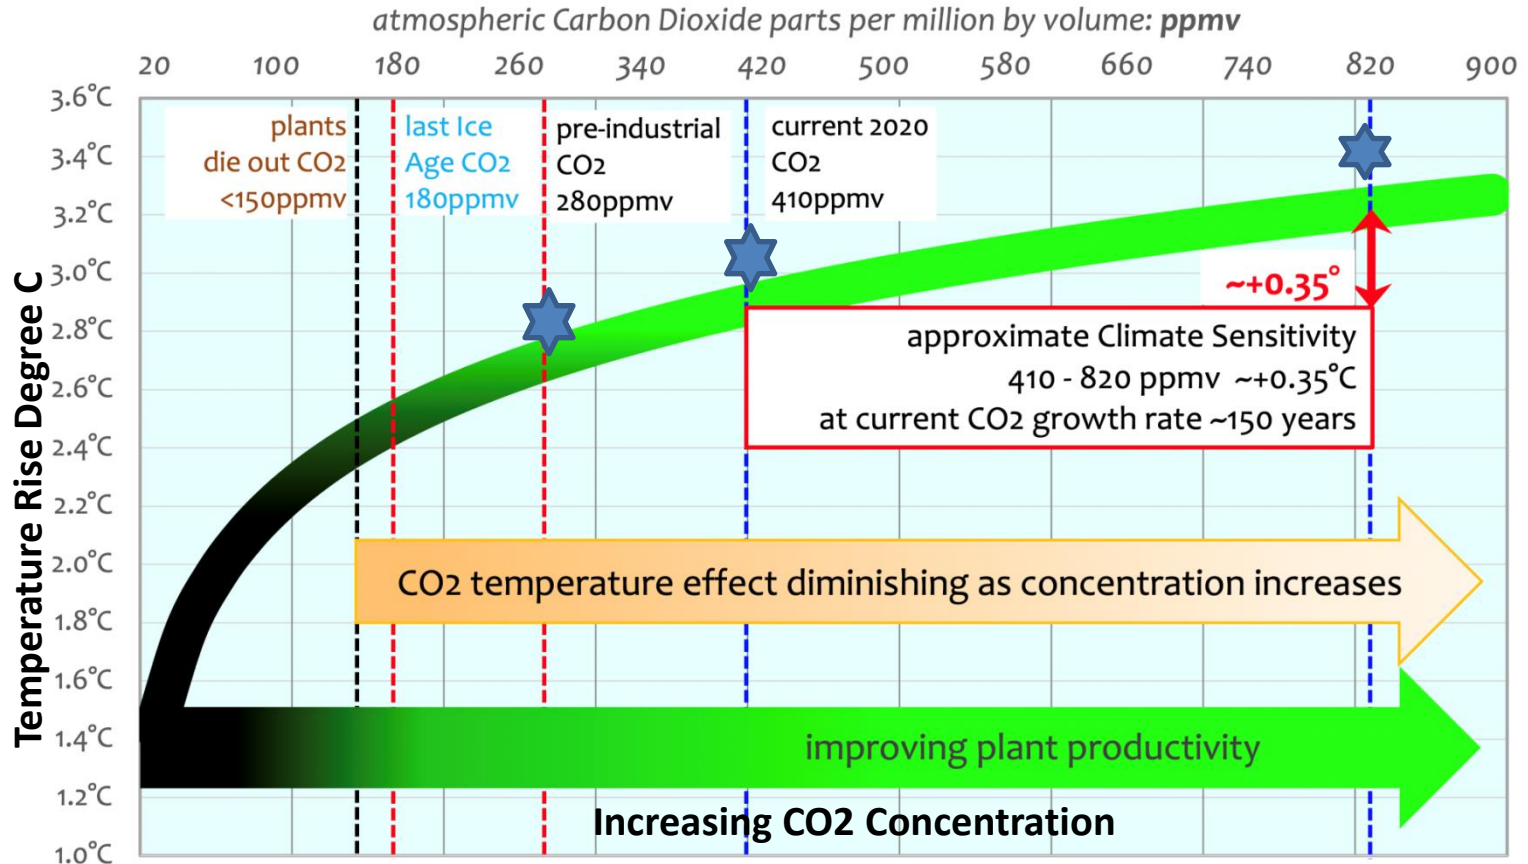

1900

2010

Conclusion: Human safety correlates positively with rising man-made CO2!

IS INCREASING CO2 A PROBLEM ???

Logarithmic diminution of the heating effect of atmospheric CO2
CO2 assumed 10% greenhouse effect $\sim 3.3^\circ\text{C}$

Additional CO2 has decreasing effect on Temperature rise.

William Happer, Princeton University

CLIMATE CATASTROPHISM

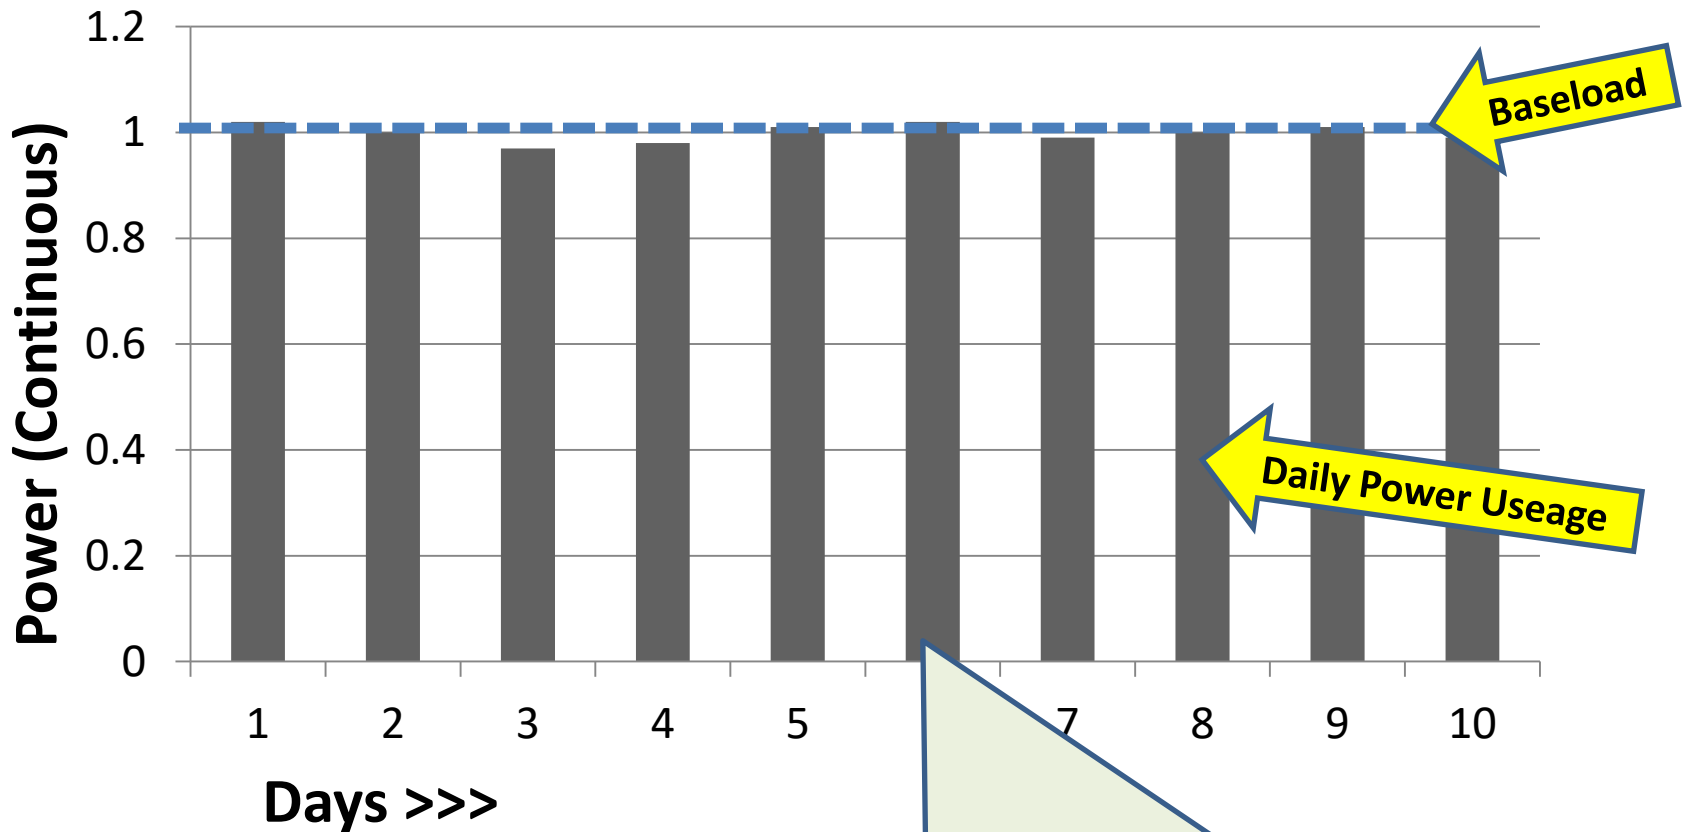

- Belief in a narrative based on intentional perversion of science
- in order to nudge the population into compliance with “official” policy
- empowering the Govt to “protect” them from an imaginary catastrophe

“Nudge” is a euphemism for Propaganda / PsyOps

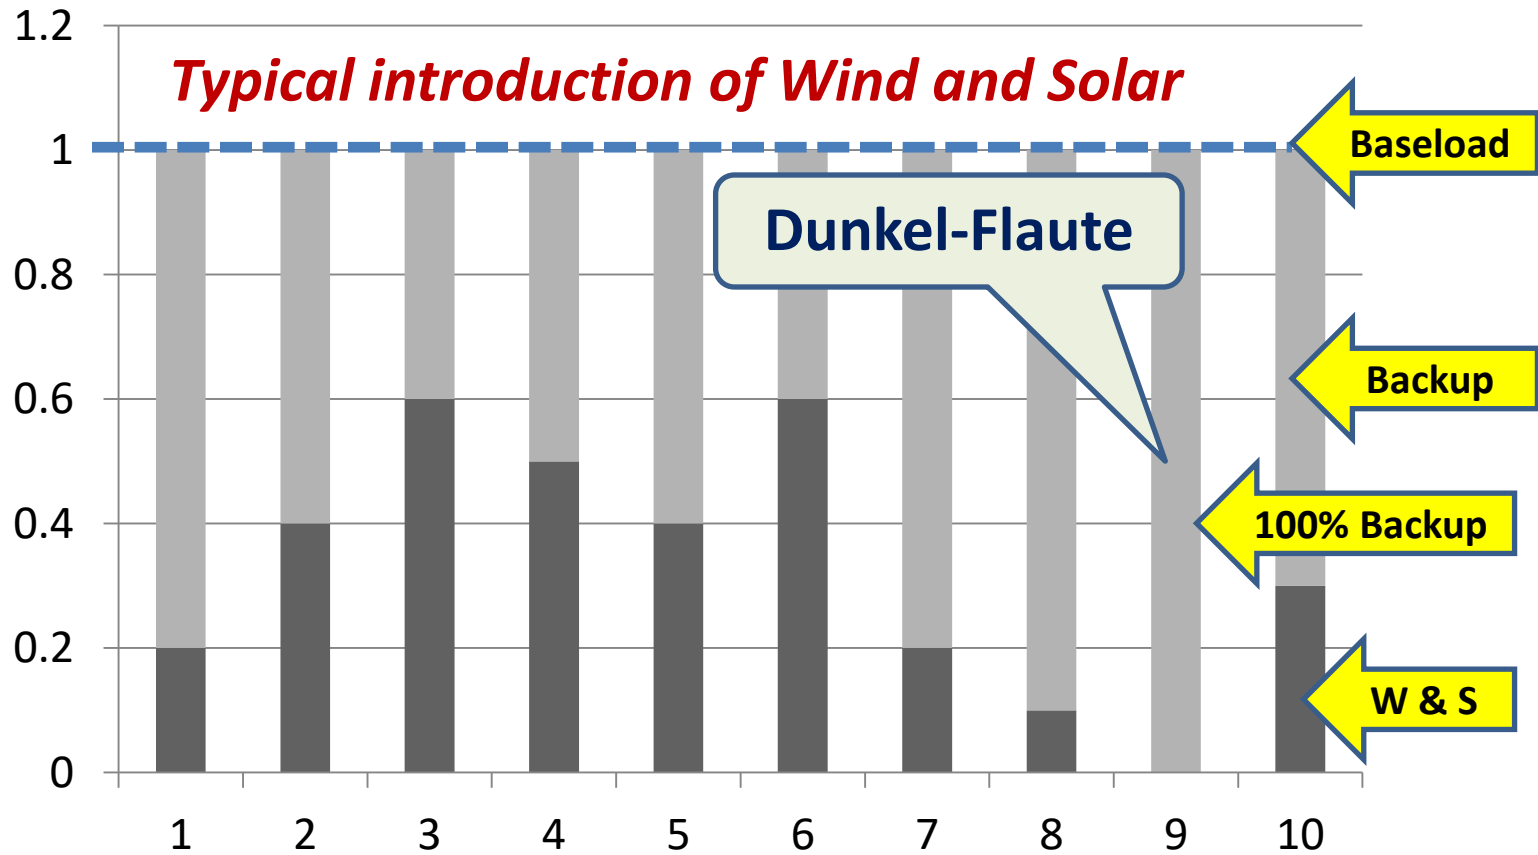

[Link to Unherd: Discussion of the use of "Emergencies"](#)

Net Zero and Baseload Power

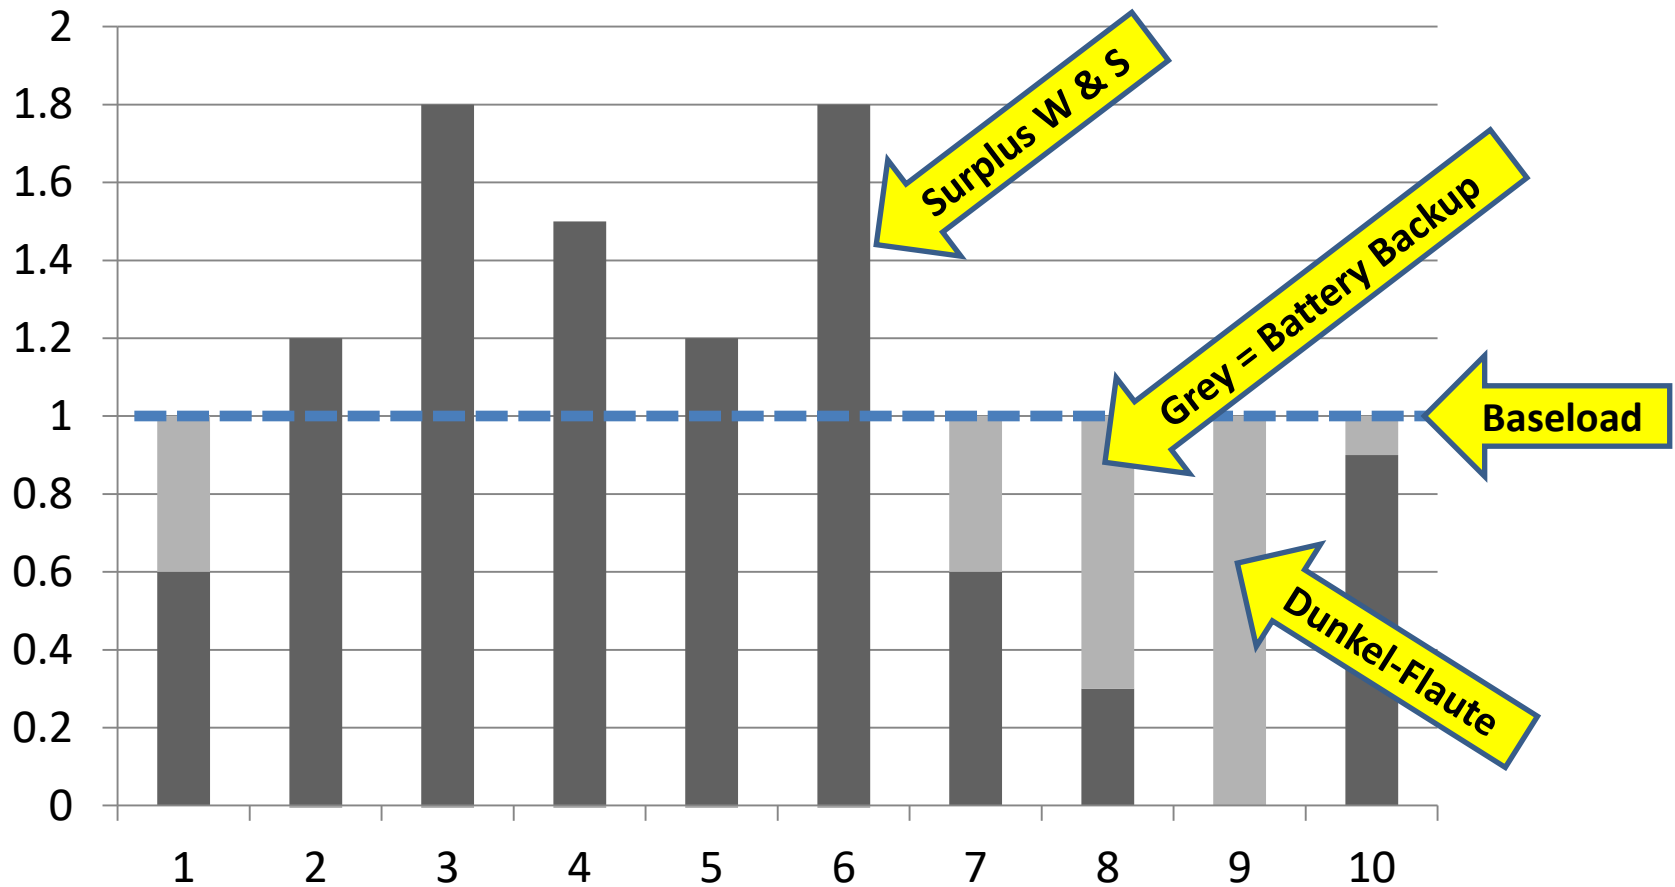

Fossil Fuels, Hydro, and Nuclear are perfect for providing Baseload Power. Steady & Reliable.

New Laws Require use of Wind and Solar FIRST

How can you get to Net Zero without Nuclear or Fossil Fuel backup? Will you shut down your entire country?

NET-ZERO (100% W & S) SCENARIO...

HOW BIG AND EXPENSIVE MUST OUR BATTERY BACKUP BE TO ENABLE NET-ZERO ?

SCENARIO: NET-ZERO CONSEQUENCES

NYS killed Indian Point Nuclear (3,200 MW); now what?

- Replace with 3-MW (nameplate) Turbines on Lake Erie (LE)
- A 3-MW Turbine will give you 1 MW *average* output on LE
- So you need 3,200 LE turbines to generate *average* power to replace 3,200 MW Indian Point Nuclear output.

But! Constant output will never happen

- Now, assume 10 days of Dunkel-Flaute (low wind)
- You need 3,200 MW x 24 H/Day x 10 Days storage
- This is 7,680,000 MWH of battery storage
- Also means adding 3x the number of Wind Turbines

Not even close to being feasible – and its just Lake Erie!

REALITIES OF NET-ZERO

- We cannot make or afford enough battery storage
- We do not have enough copper to rebuild the grid backbone to transport Lake Erie power from here to NYC
- We still need to build interconnections - \$\$\$\$
- **Cost of Batteries is about 20X cost of Turbines \$\$\$\$**
 - **Replace Batteries every 8-10 years**
 - **Battery Disposal? Environmental Nightmare**
- **Replace Turbines every 10-12 years (disposal?)**
 - **Another Environmental Nightmare**
- **We will need to rape the environment to mine enough materials required for Net-Zero**

Net-Zero Economics

CALIFORNIA NET-ZERO COST EXAMPLE:

- Cost of Nuclear/Hydro/Fossil Fuel generation = \$45/MWH
- Cost of Net-Zero “Green” Generation = \$1060/MWH
- Cost of Net-Zero is over 20x the cost of conventional

ON THE NYS CLCPA

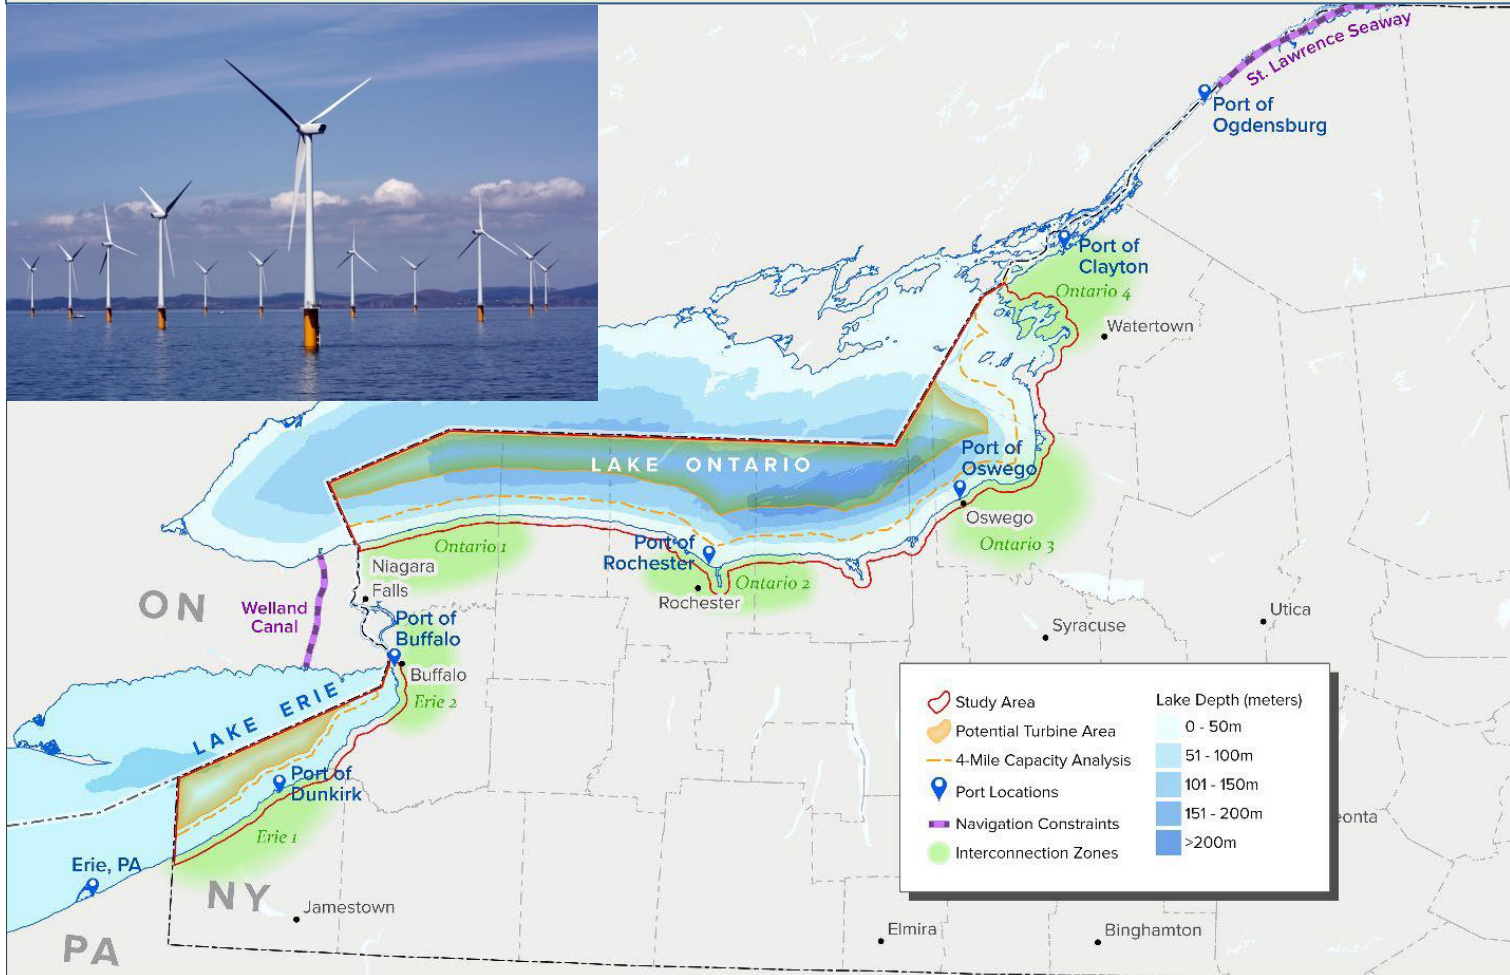

Climate Leadership and Community Protection Act (2019)

Bottom Line

- CLCPA sets impossible goals like Net Zero
- CLCPA is a license for the state to transfer YOUR wealth to well connected investors
- **CLCPA needs to be repealed if sanity is to be restored to energy policy in NYS**

NYSDERDA GREAT LAKES FEASIBILITY STUDY

TECHNICAL / ECONOMIC / ENVIRONMENTAL EFFECTS

[Link to Page for Download of White Paper](#)

NYSERDA EXECUTIVE SUMMARY

Based on the totality of this analysis, this concludes that **Great Lakes Wind** currently does not offer a unique, critical, or cost-effective contribution toward the achievement of New York State's Climate Act goals beyond what existing, more cost-competitive programs are currently expected to deliver.

Climate Act Goals: CLCPA
Climate Leadership and
Community Protection Act (2019)

[Link to Page for Download of White Paper](#)

CONCLUSION OF NYSERDA FEASIBILITY

...Great Lakes Wind projects would be significantly more costly for ratepayers to support than projects currently advanced under Tier 1 of the Clean Energy Standard (CES), such as land-based wind and solar. For example, the 2021 Tier 1 solicitation resulted in Index REC Strike Prices between \$42 and \$63/MWh, which is 55 to 230 percent cheaper than the \$98 to \$138/MWh range for Lake Erie.

...Moreover, that cost differential could increase further because the Feasibility Study cost estimates of Great Lakes Wind do not fully account for additional costs associated with interconnection, infrastructure, and labor, which would require site-specific evaluations and more detailed modeling.

THE WAR ON TAXPAYERS IS NOT OVER

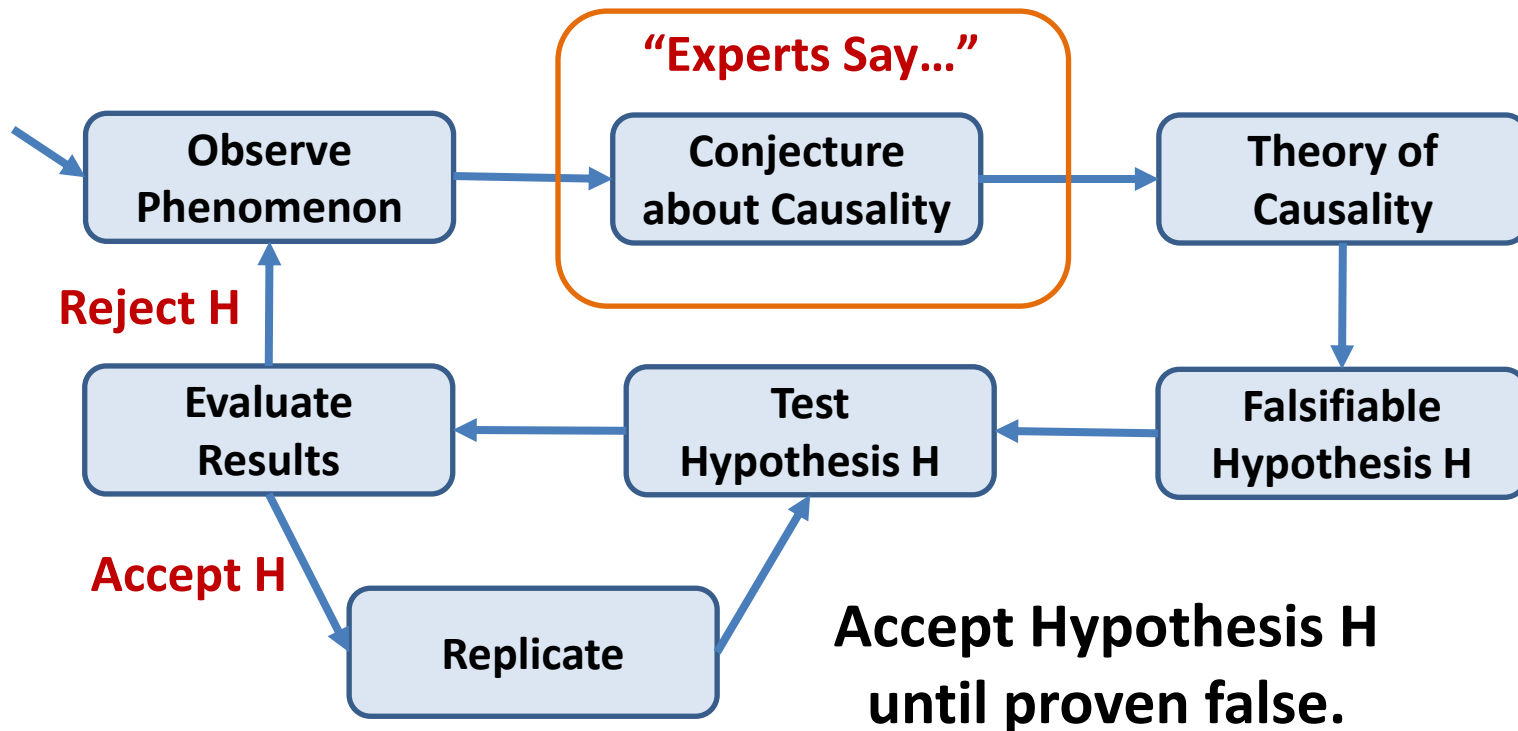

Continuing...

Taking no action now does not mean there may not be an opportunity to advance Great Lakes Wind at some point in the future.

The resource may become a feasible contributor to New York State's goals in the future as the State advances toward its mid-century goals, and the Ohio demonstration project in Lake Erie discussed herein may provide further information to help inform a decision on this matter.

SCIENTIFIC METHOD

Scientific Method separates that which is demonstrably false from that which might be true.

THE DATA CONFIRM...

Some surprises in the science

US heat waves are now no more common than in 1900, and the warmest temperatures have not risen in the past fifty years.

– CSSR, Figure 6.3

Global fire area has declined more than 25% since 2003; 2020 was among the *least* active years in the fire record

– [Andela et al. Science \(2017\)](#); [Copernicus \(2021\)](#)

Greenland's ice sheet isn't shrinking any more rapidly today than it was eight decades ago, when human influences were <20% of today's

– [Frederikse et al. Nature \(2020\)](#)

No detectable human impact on hurricanes over the past century

– CSSR Section 9.2; AR5 WGI Section 2.6.3; [Knutson et al., BAMS \(2019\)](#)

The net economic impact of 6°C warming (if it happened) will be minimal

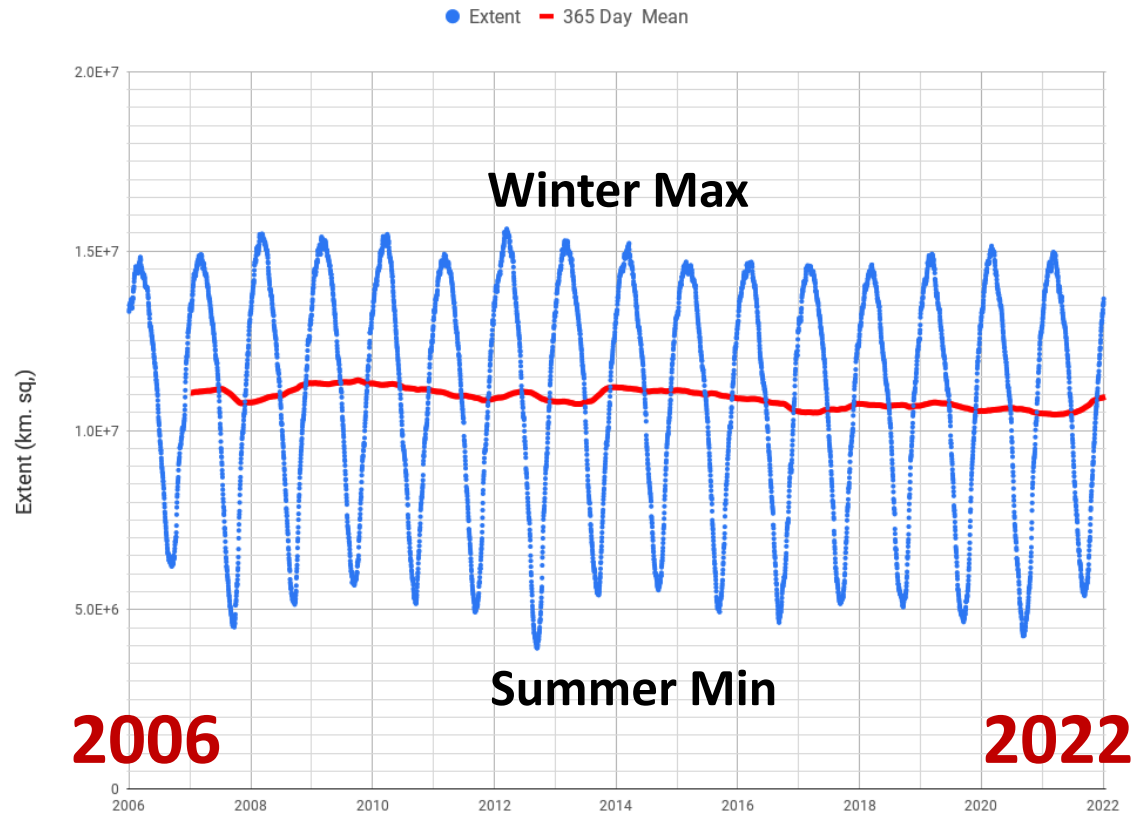

– AR5 WGII, Chapter 10; NCA2018, Figure 29.3; [Tol \(2018\)](#)

The statements above (and many others) belie the canon of climate catastrophe:

ARCTIC SEA ICE – HAS IT CHANGED ?

OSI Arctic Sea Ice Extent

ftp://osisaf.met.no/prod_test/ice/index/v2p1/nh/osisaf_nh_sie_daily.txt

Conclusion: Arctic sea ice is not melting away.

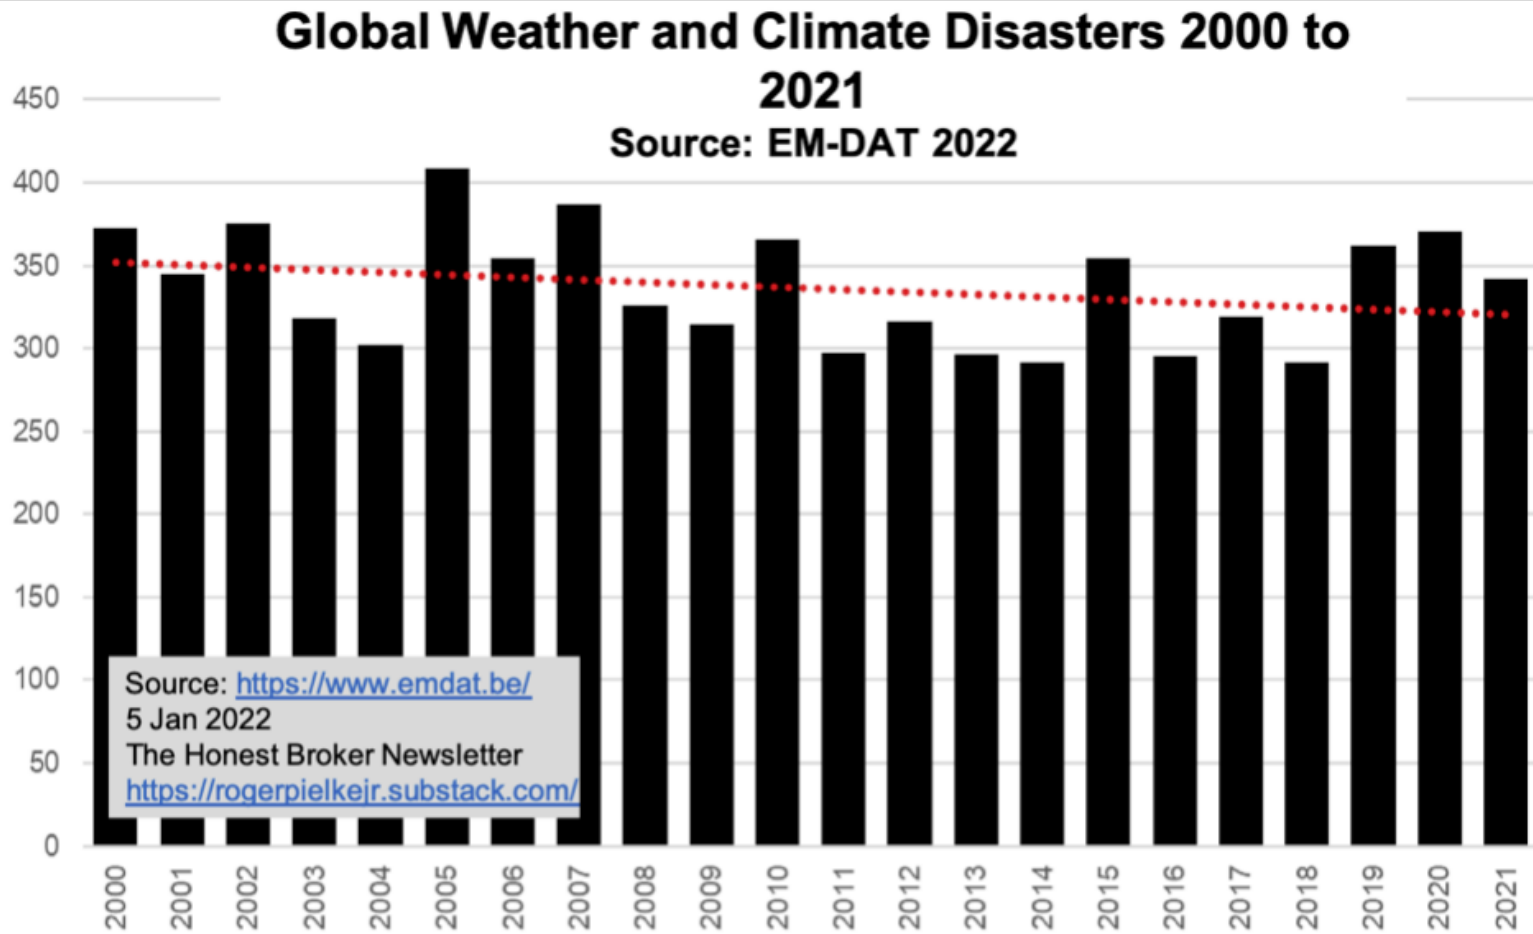

Science vs. “The Science”

Science requires application of Scientific Method, and to expose all your data and methods to the world to evaluate, replicate and invite criticism.

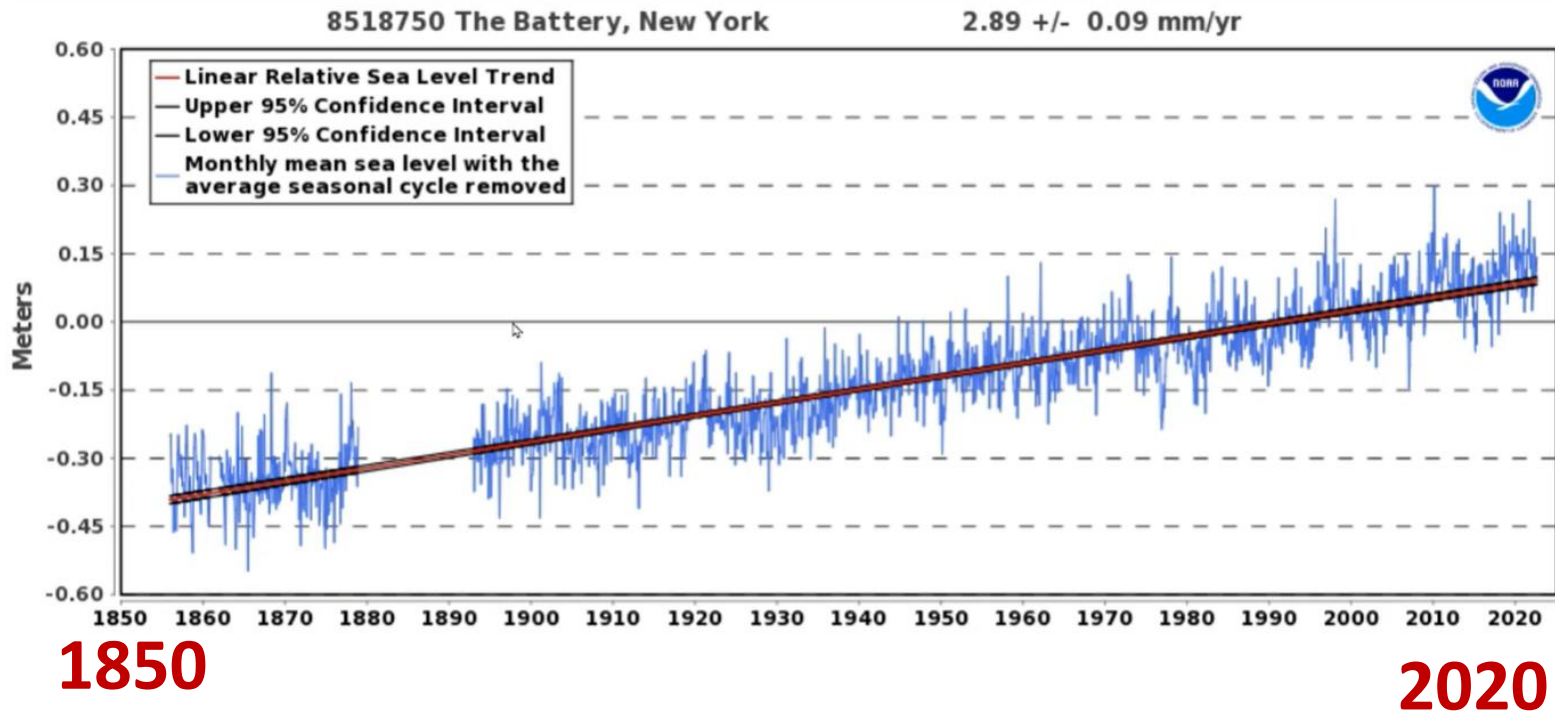

“The Science” is a fraudulent narrative based on conjecture; typically...

- Scientist say _____ could happen
- Models show that _____ will happen
- _____ is settled science (other than laws)

Climate Disasters: More and Worse!

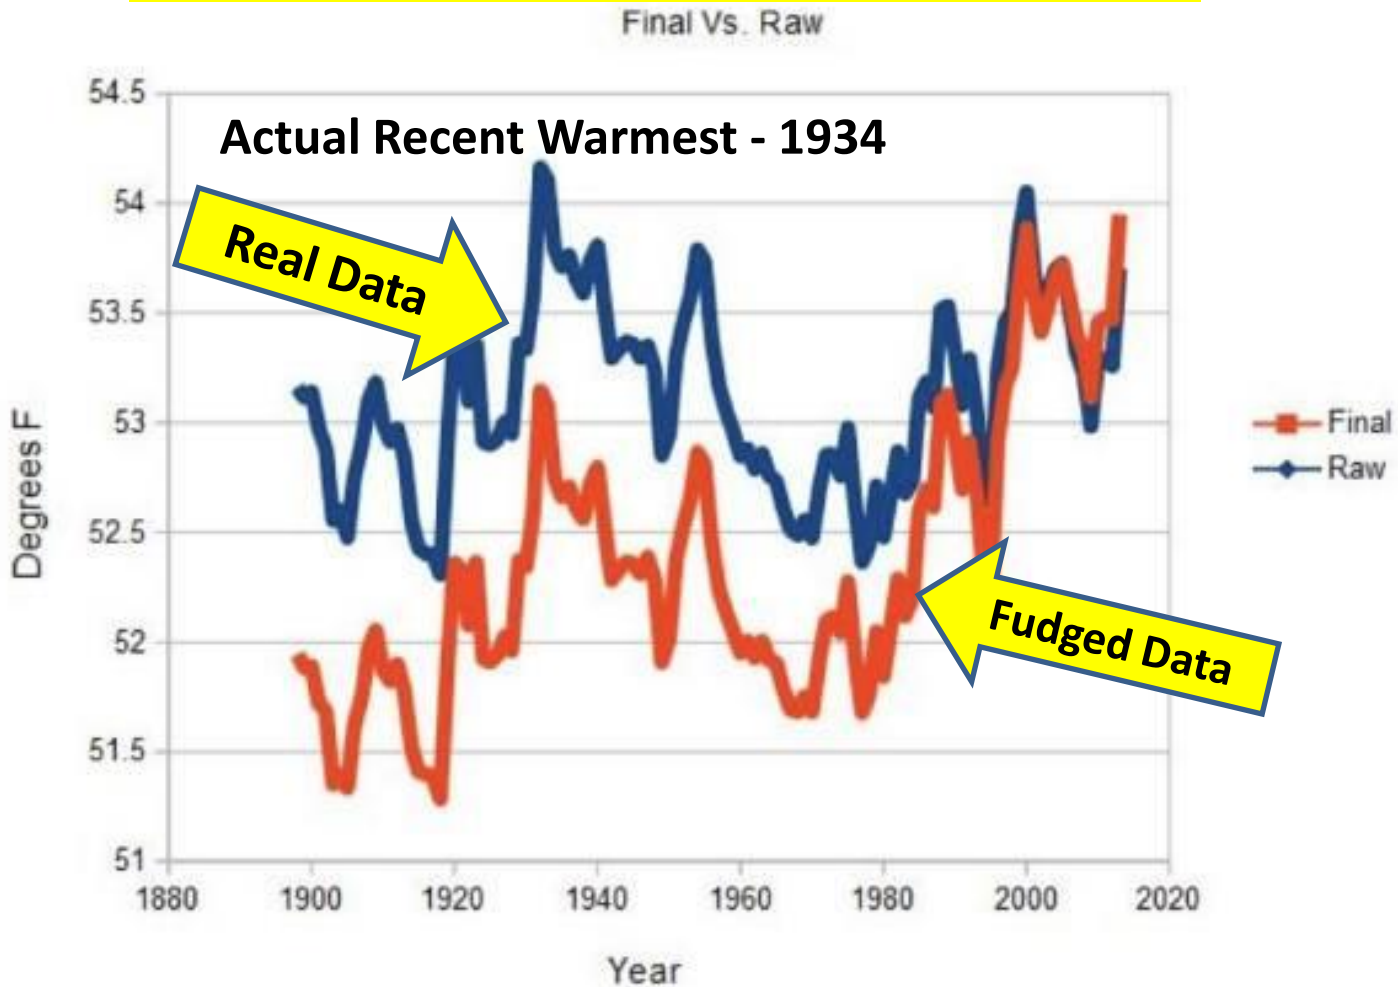

Claim: Sea levels rising because of CO2

Reality: Sea level has been rising at a relatively constant rate without correlation to increasing man-made CO2.

SEA LEVEL RISE POST ICE AGE – 400 Ft

Are rising oceans the result of man-made CO2?

GREENLAND ICE MASS BALANCE

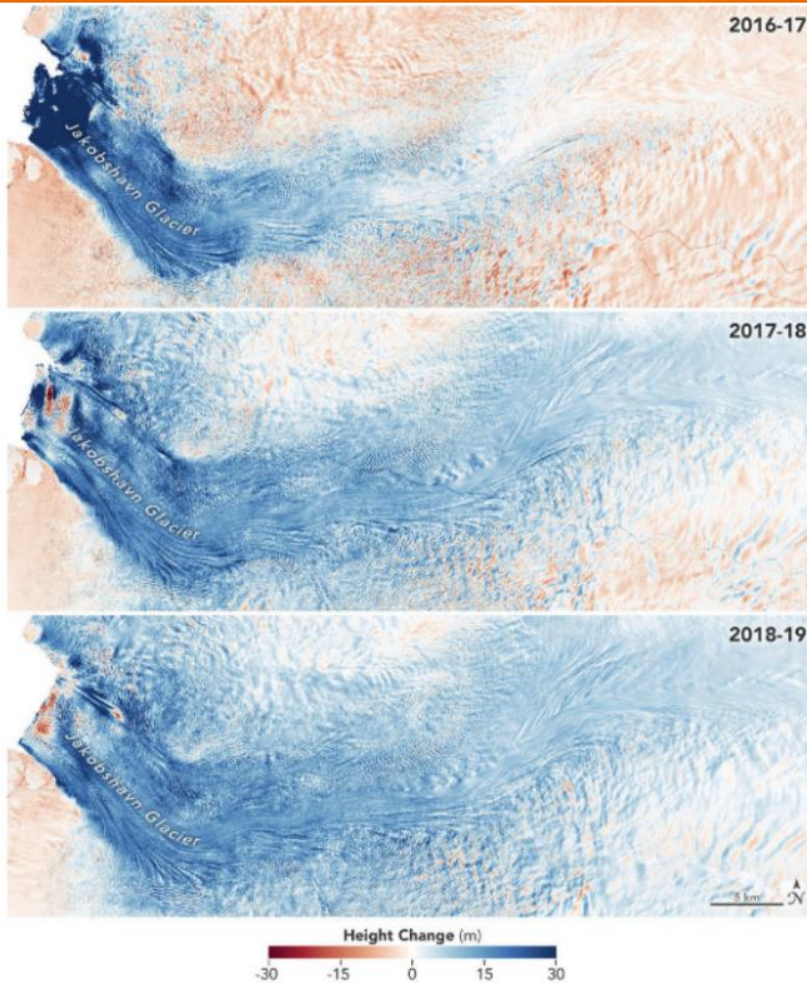

Greenland's Ice Mass has increased every year since 2008 (Millions of Tons).

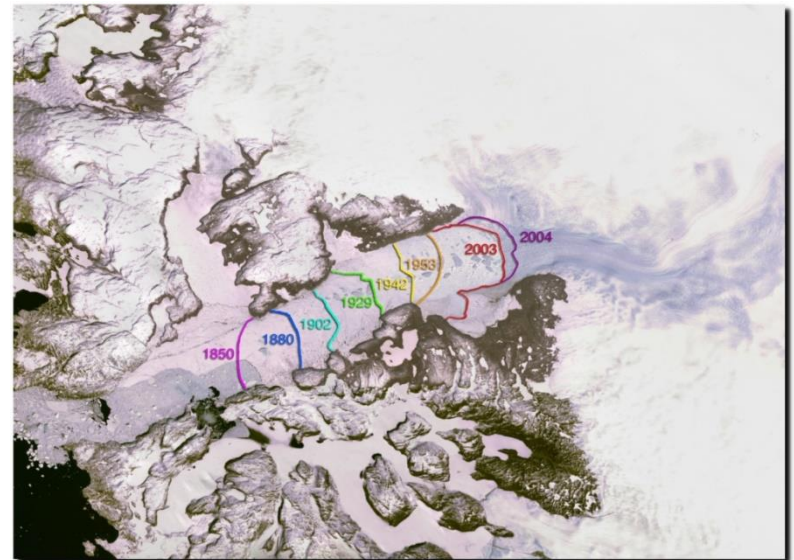

GREENLAND GLACIERS DISAPPEARING?

NEWS | June 18, 2019

Jakobshavn Glacier Grows for Third Straight Year

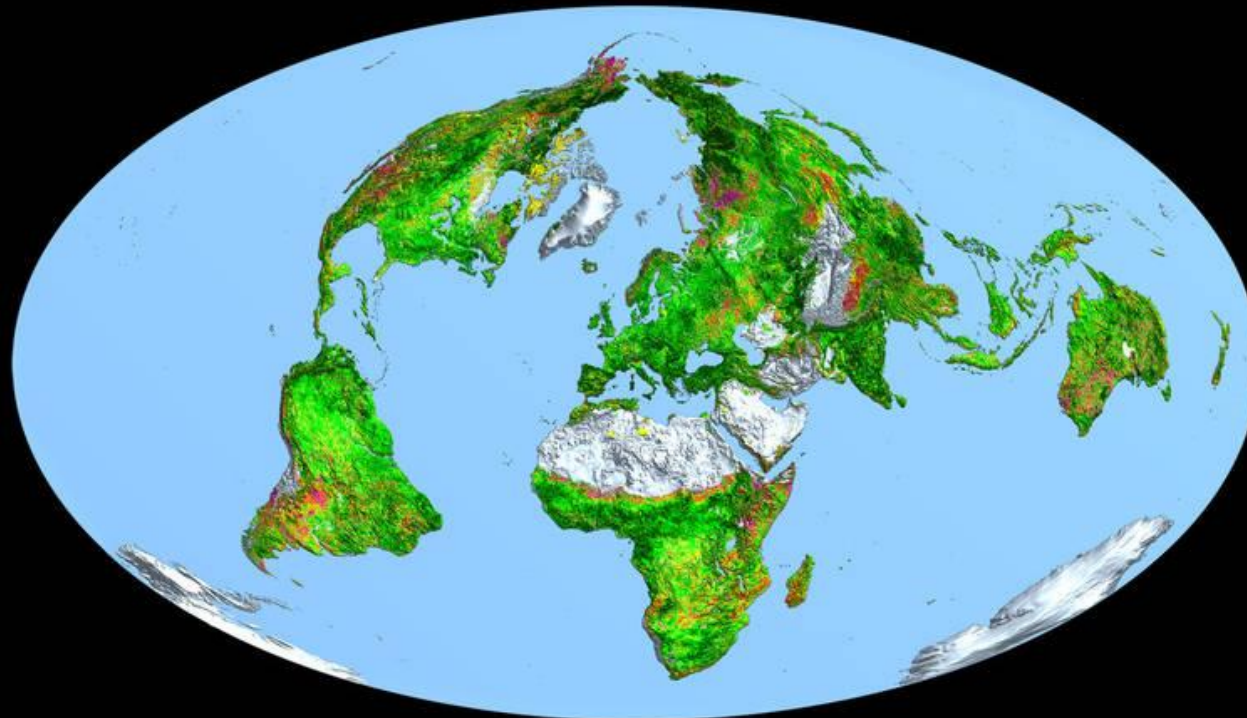

Left: From NASA...
Greenland's Jakobshavn Glacier grows since 2016.

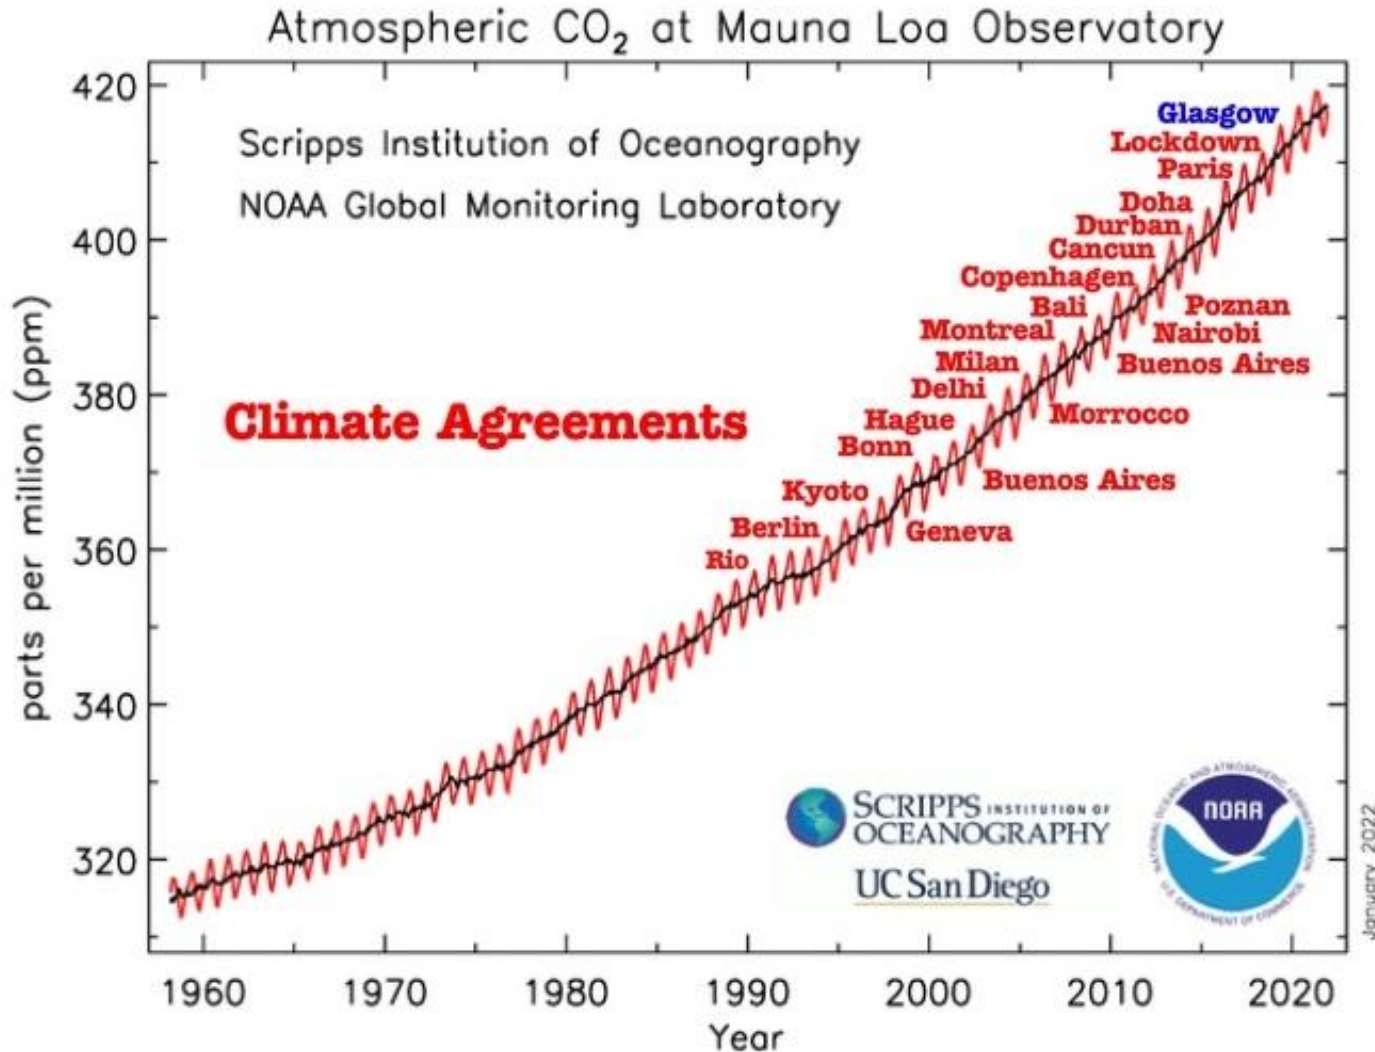

Above: The glacier had been retreating since 1850 without man made CO2!

GREENING OF THE Earth

Plants love CO₂. Holds CO₂ in check.

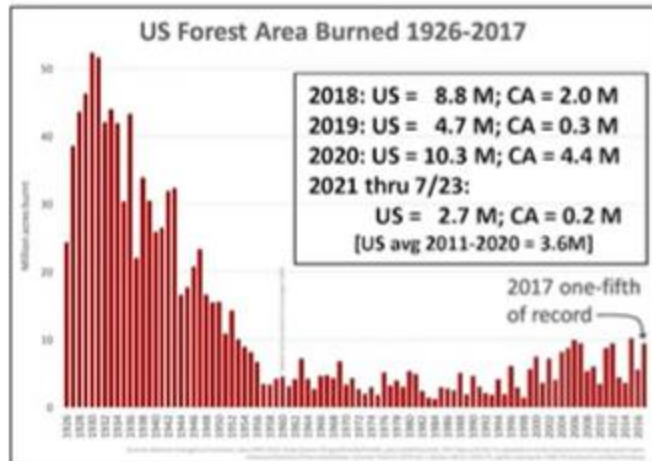

How useful are climate agreements ?

SW US fires

State-level fire data over the 20th century indicates that area burned in the western United States decreased from 1916 to about 1940, was at low levels until the 1970s, then increased into the more recent period.
– CSSR Section 8.3

Caution concerning early data

Recent fires in CA = forest management + development + drought conditions (Natural? Anthropogenic?)

Alice in Wonderland Science

"When I use a word," Humpty Dumpty said, in a rather scornful tone, "it means just what I choose it to mean - neither more nor less."

"The question is," said Alice, "whether you can make words mean so many different things."

"The question is," said Humpty Dumpty, "which is to be master - that's all."

Through the Looking Glass.

According to *People*, the 6,892-square-foot Martha's Vineyard estate was sold on Wednesday for \$11.75 million to a trust. James F. Reynolds, a longtime friend of Barack Obama who also served as a member of his national finance committee during the 2008 presidential election, is named as a trustee on the deed.

The Obamas reportedly purchased the property from Wycliffe Grousbeck, owner of the Boston Celtics, and his ex-wife, Corinne Basler Grousbeck, who bought the home in 1998. The property has been on the market since 2015.

The Obamas' new property on Martha's Vineyard.

LANDVEST

Situated on 29.3 waterfront acres near the Edgartown Great Pond, the impressive estate, which was built in 2001, features seven bedrooms, eight bathrooms, and a powder room. It also boasts an elegant master suite complete with a fireplace, as well as two guest wings, a two-car garage, a sun deck, boathouse, and a pool.

Some prominent voices at NASA are fed up with the agency's activist stance toward climate change.

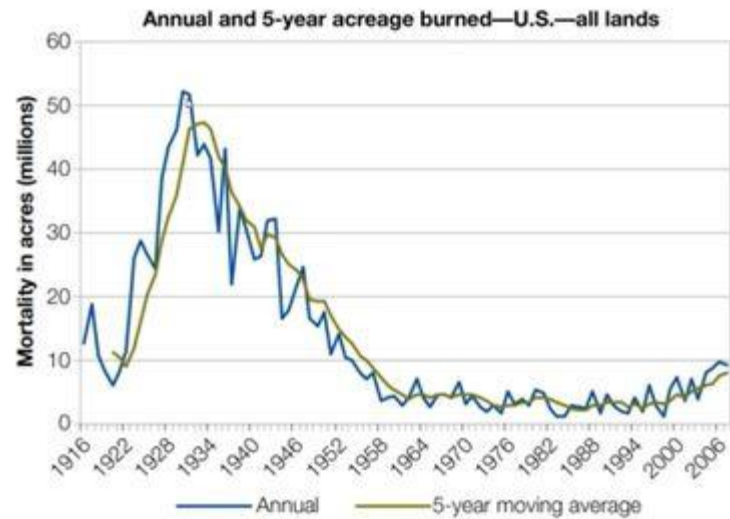

The following letter asking the agency to move away from climate models and to limit its stance to what can be empirically proven, was sent by 49 former NASA scientists and astronauts.

The letter criticizes the Goddard Institute For Space Studies especially, where director Jim Hansen and climatologist Gavin Schmidt have been outspoken advocates for action.

“Within a decade, there will be no more snows of Kilimanjaro” due to warming temperatures.”

Al Gore An Inconvenient Truth 2006 

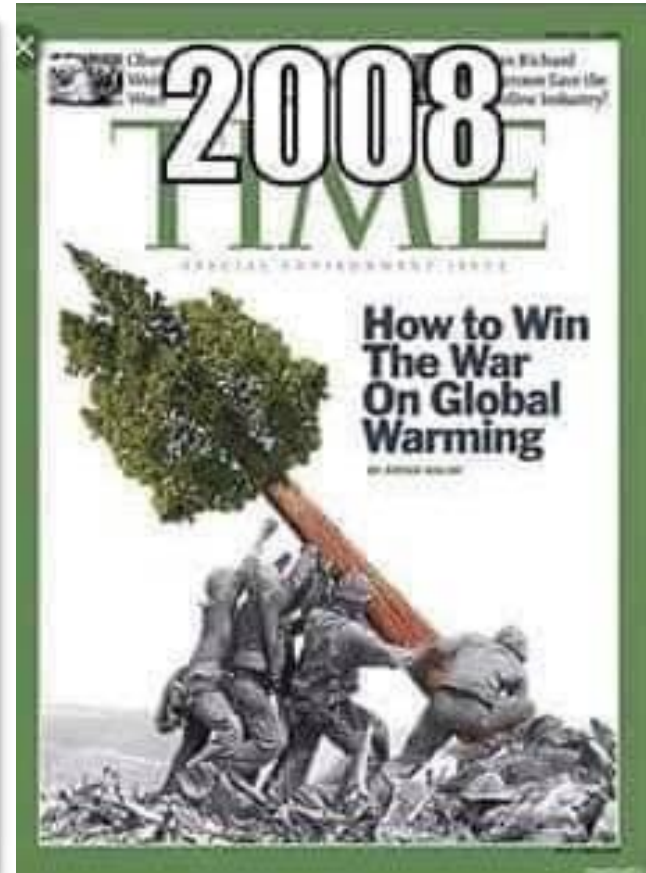

Associated

Press Although scientists, including some from the University of Massachusetts, predicted a decade ago that the snows of Kilimanjaro could vanish by 2015, a prediction that became a part of key evidence for global warming offered during the 2006 documentary “An Inconvenient Truth,” new studies indicate the snowcap will remain for several more decades. (AP Photo/Ohio State University, Lonnie Thompson)

AMHERST - If there is a poster child for global warming, it may be the vanishing snows of Kilimanjaro, which were predicted to disappear as early as 2015 in a widely-publicized report a decade ago.

However, the famed snowcap is stubbornly persisting on the African peak and may not fully vanish for another 50 years, according to a [University of Massachusetts](#) scientist who had a hand in the prediction.

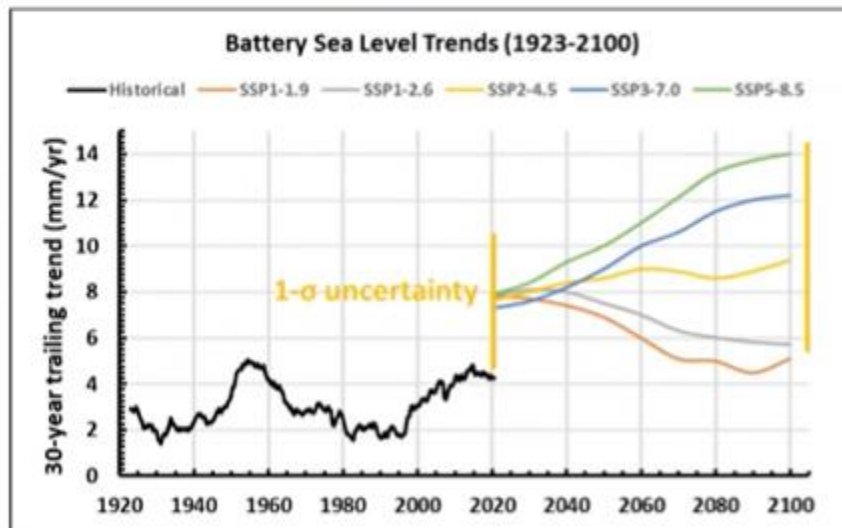

AR6 Sea Level Projections are extraordinary

Highly discordant local projections

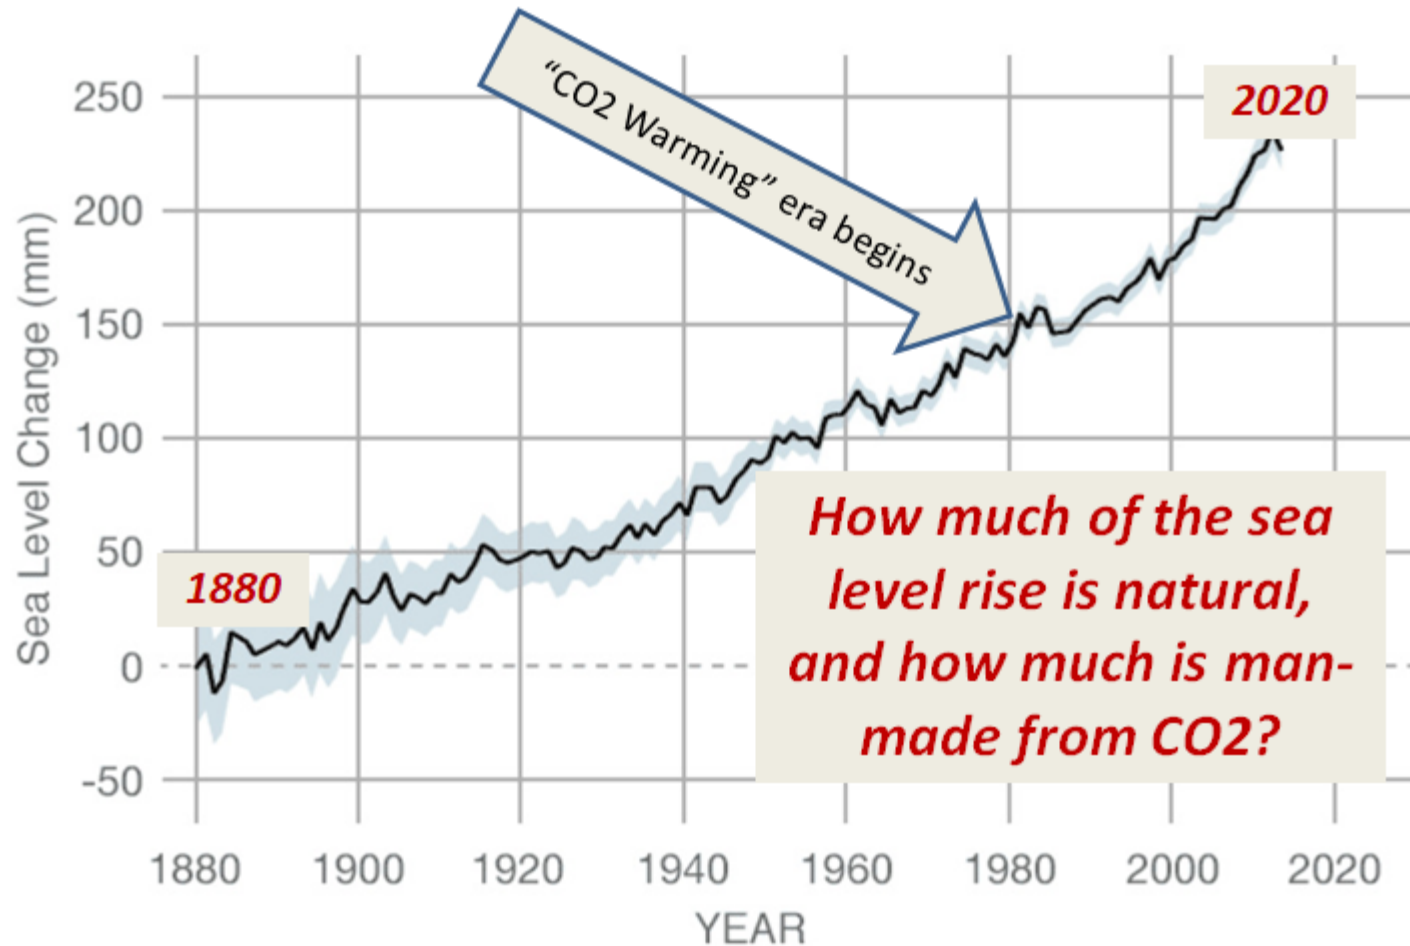

<https://sealevel.nasa.gov/ipcc-ar6-sea-level-projection-tool>

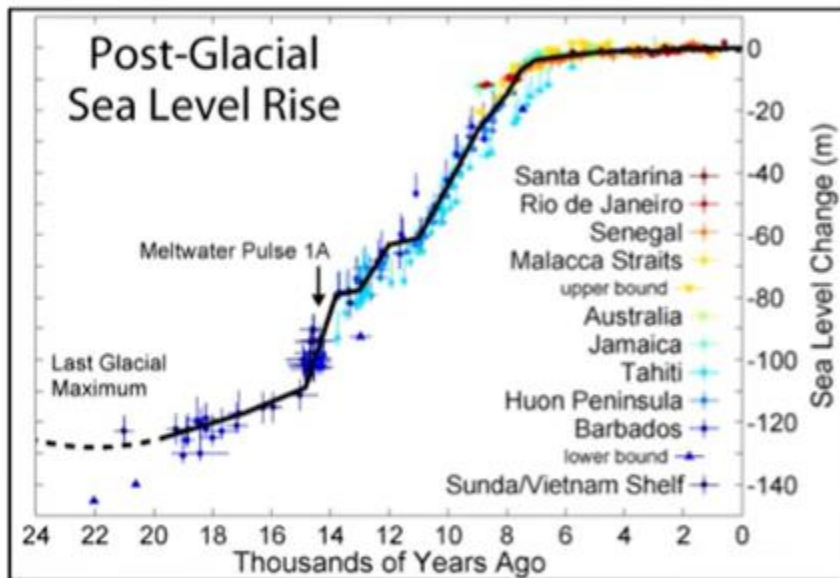

... the use of these [climate] models to guide local, practical adaptation actions is unwarranted. Climate models are **unable to represent future conditions** at the degree of spatial, temporal, and probabilistic precision with which projections are often provided, which gives a **false impression of confidence to users** of climate change information.

- [Nissan et al. \(2019\)](#)

IS CO2 CAUSING SEA LEVEL RISE ???

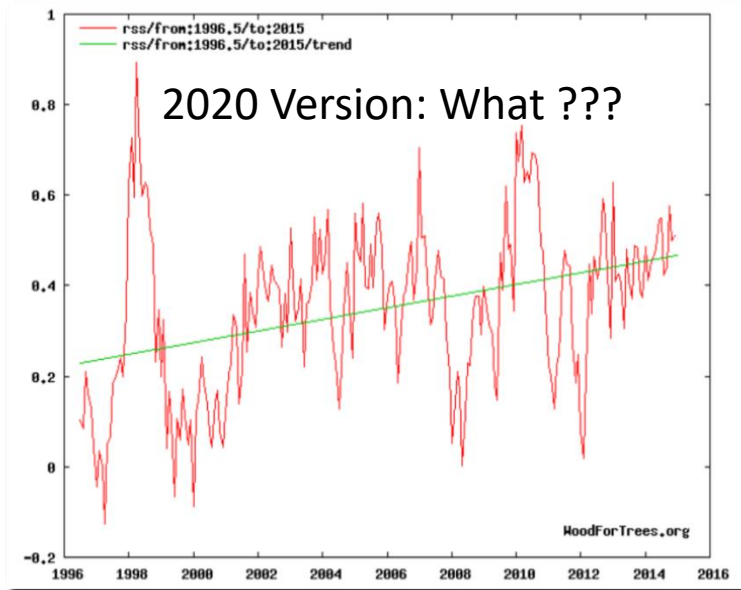

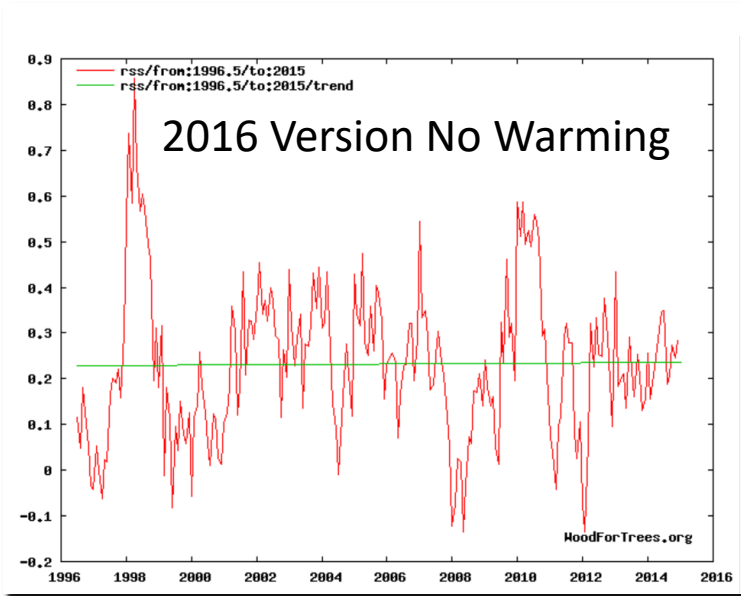

Sea level has been rising for 20,000 years

https://commons.wikimedia.org/wiki/File:Post-Glacial_Sea_Level.png

- Has sea level rise (SLR) accelerated since ~1900?
 - Discussion hinges on ~0.1 mm/yr differences
- To what extent is acceleration anthropogenic?
- What will happen in the next few centuries?
